Night checklist रात की पारी की सूची

Pukaar duty officer · night shift 20:00 to 08:00 IST
Full guide: docs/field/officer-guide.md

Date / shift | Me (sign-in name) | Backup | Escalation (ADM / DM)

DEOC landline | On-call engineer | DDMO | Wake-up call: ON / OFF

1 · Start of shift पारी शुरू

- [ ] Sign in: password, then the 6-digit code from the authenticator app, **Verify**.
- [ ] **Duty roster** → **Take over this shift**. The chain shows a Backup and an Escalation officer. "Nobody is rostered": fill it with **Edit** → **Save**.
- [ ] **Pending approvals**: read every card, including **Show N more**. An alert drafted before 20:00 still asks the day chain: decide it yourself.
- [ ] **Act** tab → **Get approval alerts on this phone** says "On" → **Send a test notification** arrived.
- [ ] Telegram linked (**Get my code**, send `/start link_…` to the bot) if not done before.
- [ ] Phone charged, ringer on, browser and Telegram allowed through Do Not Disturb.
- [ ] **System** card all OK. **Villages by risk**: any "Data late" or "No data" at Watch or above → phone the gauge reader or pradhan.
- [ ] **Roll-call** tab: no one left under **Need help**.
- [ ] Tonight's IMD district warning and CWC bulletin read.

2 · When the phone buzzes चेतावनी आए तो

1. Open the Telegram link, the notification or the console. Press **Listen**.
2. **Why this level?** The strongest line comes first (river, rain, gauge, verified reports); "Get ready" and official sources never set the level. Check village, level and advice in the text.
3. Decide within **3 minutes**; Critical within **2** (a turn lasts 5 min for a Critical, 10 for others). Unsure at Watch: phone the pradhan or gauge reader first. Never let it run out.
4. **Approve** → confirm "This alert goes to N people now". **Decline** → write a reason.
5. **Recipients (N)**: the pradhan's row shows "Relay done: siren and megaphone" within 10 min, or **phone the pradhan**.
6. Critical: phone the DDMO and the pradhan now; ask which safe place is open and set it **Open** on the village page.

The wake-up call never approves. Press 1 = the link again. Decide in the app.

Escalation clock अगले अधिकारी तक

0 min link, notification, console · **3 min** (Critical 2.5) reminder and wake-up call if the link is unopened · **10 min** (Critical 5) the next officer: Primary → Backup → ADM / DM.

3 · After delivery भेजने के बाद

- [ ] Red errors or many "no acknowledgement yet" on a live Warning or Critical: phone the pradhan to pass it on.
- [ ] **Roll-call** (opens by itself after a live Warning or Critical): **Need help** first, call back or send the task force; **Remind the ones who have not answered** every 30 min.
- [ ] Roads and shelters current: **Open** / **Standby** / **Full** / **Closed**; **Mark route blocked**.
- [ ] Unverified villager reports read; verify only after a call (**Verified**).
- [ ] Back to Normal: the all-clear goes by itself ("All-clear sent").
- [ ] **Was this real?** → **Real flood** / **No flood** / **Unknown** within 48 h, after talking to the pradhan.
- [ ] **After-action report** ↗ opened and saved for the event report.

4 · If something breaks गड़बड़ी हो तो · each alarm: docs/RUNBOOK.md

No answer in time	Next officer is asked. A Critical is **not sent** on the pilot: phone the village and the DDMO now; the sweep asks again in 30 min.
Console down	Try the Telegram link; else decide with the DDMO by phone, warn the village by phone, log it. Call the engineer.
sweep-heartbeat	Pukaar is watching no village. Engineer and DDMA **now**; use IMD, CWC and gauge readers by phone.
village-data-stale	"Normal" is not safe there. Phone the gauge reader; tell the DDMA if at Watch+ or rain is forecast.
Gauge silent 30 min	Not counted. Ask the gauge reader to read the staff gauge.
rollcall-need-help	A person: call back or send help. Tell the DDMA.
nobody-on-duty	Fill the roster or take over the shift.

5 · Hand-over, 08:00 पारी सौंपना

- [ ] Day officer has seen every pending card; open roll-calls and Need help names handed over.
- [ ] Roads and shelters current; night's alerts answered "Was this real?" or noted in the log.
- [ ] Day officer presses **Take over this shift**.

Levels: Normal सामान्य · Watch सतर्क · Warning चेतावनी · Critical गंभीर. Nothing reaches a village until an officer approves. Emergency **112**
